

MANROY ENGINEERING

JOB DESCRIPTION

TITLE	General Assembler/Machine Operator	DATE	Feb 2015
--------------	------------------------------------	-------------	----------

The Assembler / Machine Operator will assemble complete weapons, their sub-assemblies and other ancillary equipment to comply with the requirements as set out on job cards, works orders, drawings, quality procedures, work instructions and other specified requirements, as directed by the Management. This post reports to the Assemble Supervisor

Duties will include:

- Correctly identifying parts and assembling into the various assemblies used in the production of all Manroy products
- Working in a 'toolroom' environment with experience of using the following equipment
 - Surface Grinders, Milling, Turning & Drilling centres.
- Working from Engineering drawings (metric & imperial)
- Using measuring equipment ie. Micrometers and Vernier Calipers etc.
- Working as part of a team as well as working unsupervised
- Ensuring all work undertaken in-house is conducted in a manner to comply with the requirements of Manroy's Quality Manuals, Work Instructions, Health and Safety Instructions as well as all legal obligations pertaining to the safe handling and storage of armaments/weapons under the Company Section 5 approval
- Maintaining the workplace in a clean and tidy state at all times
- Supporting the company in all appropriate areas of its business when the need arises as instructed by management, under supervision if necessary.
- Any other reasonable adhoc duties that may be required.

Must have an Engineering/Mechanical Background

Requirements

- Must be able to operate 'toolroom' equipment
- The physical ability to carry out manual handling tasks
- The ability to follow processes accurately
- Strong attention to details
- Good numeracy skills
- Good Communication Skills
- Enthusiasm, professional attitude and willingness to learn

Counterbalance Fork Lift Truck Licence would be advantageous
